

Adding a Smart Form to Your Website

In most cases your website will be pre-populated with the Smart Forms your agency has requested. The following procedures will allow you to add a new Smart Form in the event another is required. Refer to Appendix A for a list of currently available Smart Forms and guides and how they are intended to be used and where to enter content. You can also view available Smart Forms by going to the [Page Layouts – Smart Forms webpage](#).

If a Smart Form is listed in Appendix A or on the Page Layouts – Smart Forms webpage and does not appear in the **New > Smart Form drop-down menu for your site**, please contact Stateweb at (775) 684-7323.
